Mitsubishi

PAJERO_{NW}

***Commercial, Commercial Deluxe
and Protector Bull Bar***

We're giving Mitsubishi owners a bit of love with the new range of Ironman 4x4 bull bars for the NW Pajero. Designed from the ground up after being 3D scanned in Melbourne, Australia, the new bull bars for the NW Pajero improve approach angle, frontal protection and aesthetics!

The NW Pajero bull bar was designed around the curves and shape of the vehicle. The 3D scan allows precision design for best possible fit combined with the much needed improved approach angle, these bull bars inject a bit of toughness into the look of the NW Pajero.

All Ironman 4x4 bull bars are designed to be Winch, ADR and airbag compatible and the NW Pajero is no exception. Ironman 4x4 have designed the NW Pajero bull bar to ensure added frontal protection. For this reason we've added under bull bar plates to provide protection from in front and under the vehicle, especially the otherwise venerable intercooler and radiator!
